How to replicate the results

- Install dependencies:
  - `pip install pandas numpy scikit-learn nltk`
- Change line 73 in the code to whichever project you want to run the code on:
  - The available options are: `'pytorch', 'tensorflow', 'keras', 'incubator-mxnet', 'caffe'`
- Run the code:
  - `python solution.py`
- Check the results:
  - Results are displayed in the terminal and in `{project}_NB.csv` in the root directory.
